Product Name :
Suspension And Shock Absorber Trainer

Product Code :
LBNY-0005-120000204

Description :

Suspension And Shock Absorber Trainer uses real automotive components to demonstrate the suspension damping control in car as well as dynamic analysis on the vehicle as it is in breaking acceleration motion on bends motion on different road condition. Suspension And Shock Absorber Trainer is designed to demonstrate the theory and operational characteristics of todays modern suspension systems, which feature computer-controlled damping systems.

Technical Specification :

Suspension And Shock Absorber Trainer
