Product Name :
Hydraulic Dual Circuit Brake System

Product Code :
LBNY-0005-120000216

www.laboratoryinstrumentindia.com

Description :

The demonstration board is designed so that the brake system is fully operational. When the brake pedal is depressed, the hydraulic circuit is activated which controls the drum and disc brake. Hydraulic Dual Circuit Brake System demonstration board shows the design and function of a hydraulic dual circuit brake system. While the brakes are in operation the brake light is illuminated.

Technical Specification :

Hydraulic Dual Circuit Brake System
