Product Name :
Common Rail Diesel

Product Code :
LBNY-0005-120000226

Description :

This circuit consists of a radial piston pressure pump, one delivery manifold, and an electro injector, all connected via high pressure hoses. Common Rail Diesel shows an accurate cross-section of the high pressure fuel system known as common rail.

Features:

- Electro Injector
- Hand Crank
- High Pressure Hoses
- Radial Piston Pressure Pump
- Delivery Manifold
- Mounted on a Laminate Base.

Technical Specification :

Common Rail Diesel
