Product Name:

Supplemental Inflatable Restraint Dual Air Bag System

Product Code: LBNY-0005-120000241

Description:

The Air Bag portion of the trainer is a nonfunctional disarmed unit. The Supplemental Inflatable Restraint Dual Air Bag System trainer uses an actual SIR System that electrically responds and operates as in the automobile.

Features:

Provides an advanced level of instruction by duplicating actual on-vehicle troubleshooting procedures.

Actual new vehicle components, connectors, and factory wire colors.

Courseware includes Instructor Guide, Student Manual, and Service Manual Information.

Crash simulation using sensor impact push switches and bag deployment strobe.

Intermittent and hard fault codes can be inserted using the built-in keypad, a single computer.

Ability to perform actual service manual test procedures.

Performing airbag disposal procedures

Study of removal and installation of system components.

Technical Specification:

Supplemental Inflatable Restraint Dual Air Bag System
