Product Name :
Power Door Lock System Trainer

Product Code :
LBNY-0005-120000246

Description :

Power Door Lock System Trainer allows for instructor demonstration, student hands-on reinforcement and troubleshooting practice. The Power Door Lock Trainer is designed to teach computer and network controlled automotive door lock and theft deterrent system operation. Powered by a 12VDC automotive battery or a 12VDC/23A power supply (not included).

Features:

- Intermittent and hard fault codes can be inserted using the built-in keypad, a single computer, or the Ability to perform actual service manual test procedures.
- Actual new vehicle components, connectors, and factory wire colors.
- Provides an advanced level of instruction by duplicating actual on-vehicle troubleshooting procedures.
- Compatible with Instructor Management Program (IMP).
- Courseware includes Instructor Guide, Student Manual, and Service Manual Information.
- Operated as a stand-alone trainer, or connected to the Lighting System Trainer and the Instrument Panel Trainer to teach and demonstrate vehicle systems integration.
- The key fob can be used to lock and unlock the doors when used as a stand-alone unit and used in conjunction with the Lighting System Trainer.
- Battery posts are protected against polarity reversal.
- Controlled by Body Control Module (BCM).
- Includes internal power supply for fault activation.
- The built-in buzzer (horn) can be disabled from the front panel.
