**Product Name :**  
Starting System Trainer

**Product Code :**  
LBNY-0005-120000263

### Description :

Starting System Trainer allows for instructor demonstration, student hands-on reinforcement and troubleshooting practice. The Starting System Trainer is part of an electrical system program which presents the live operation and study of starter motor systems. The Starting System is based on a CAN platform vehicle. Powered by a 12VDC automotive battery (not included).

### Features:

- Intermittent and hard fault codes can be inserted using the Instructor Management Program (IMP) Computer connected to the trainer or over the Network System (ANS).
- New vehicle components, connectors, and factory wire colors.
- Provides an advanced level of instruction by duplicating actual on-vehicle troubleshooting procedures.
- Compatible with Instructor Management Program (IMP).
- Includes external power supply for fault activation.
- Connects to a 12 VDC automotive battery (not included).
- Courseware includes Instructor Guide, Student Manual, and Service Manual Information.
- Hard faults can be inserted by using the built in keypad on the Starting System Trainer.
- Ability to perform actual service manual test procedures.
- Battery posts are protected against polarity reversal.
- Keypad displays built-in scan tool data.
