**Product Name :**  
Charging System Trainer

**Product Code :**  
LBNY-0005-120000265

### Description :

Charging System allows for instructor demonstration, student hands-on reinforcement and troubleshooting practice. The Charging System is part of an electrical system program which presents the live operation and study of charging systems. The Charging System Trainer is based on a CAN platform vehicle. Powered by a 12VDC automotive battery (not included).

### Features:

- Provides an advanced level of instruction by duplicating on-vehicle troubleshooting procedures.
- Intermittent and hard faults can be inserted using the Instructor Management Program (IMP) via a computer connected to the trainer
- Hard faults can be inserted by using the built in keypad on the Charging System.
- New vehicle components, connectors, and factory wire colors.
- Battery posts are protected against polarity reversal.
- Includes external power supply for fault activation.
- Compatible with Instructor management Program (IMP).
- Ability to perform service manual test procedures.
- Connects to and charges a 12VDC automotive battery.
- Courseware includes Instructor Guide, Student Manual, and Service Manual Information.
- User interface displays built in scan tool data.
