Product Name :
Commercial Refrigeration Unit With Fault Simulation

Product Code :
LBNY-0005-12100026

Description :

Commercial Refrigeration Unit With Fault Simulation device can be used to train students to master the theoretical knowledge and practice skills of the commercial refrigeration system.

Features:

Mobile refrigeration unit with normal cooling stage and deep-freezing stage
Built in faults set module.
Individual and parallel operation of the cooling stages possible
Cooling stages: insulated chambers with air-cooled evaporators
Selection of cooling stage via solenoid valves
Semi-hermetic piston compressor, air-cooled condenser
All fans are speed-controlled.

Technical Specification :

Commercial Refrigeration Unit With Fault Simulation

Laboratory Instrument India
