# **Product Name :**Analog Circuit Training Kit

Product Code:

#### **Description:**

All the experiment module are located on the circuit board, the trainees can build the experiment circuit by connecting the different module via locking jack leads.

#### **Experiments:**

Differential amplifier circuit
Proportional summation circuit
Integral and differential circuit
Negative feedback amplifier circuit
Emitter follower
Waveform generating circuit
Single-stage amplifier circuit
Two-stage amplifier circuit
Active filter.

### **Technical Specification:**

Analog Circuit Training Kit

## **Laboratory Instrument India**
