Product Name :
Fuel Injector Cleaner And Tester Four Injectors

Product Code :
LBNY-0005-12100050

Description :

The device simulates various working conditions of the engine, cleaning and detecting the fuel injection nozzle of various automobile, and can also carry out the cleaning of the automobile fuel injection nozzle and the fuel supply system. The equipment adopts ultrasonic cleaning technology and microcomputer oil pressure closed loop control cleaning detection technology.

Features:

- On-vehicle Cleaning
- Ultrasonic Cleaning
- Uniformity & Spray ability Test
- Direct Flush
- Reverse Flush
- Auto cleaning test function
- Leakage Test.

Technical Specification :

Fuel Injector Cleaner And Tester Four Injectors
