Product Name :
Electric Vehicle Vacuum Booster Brake System Trainer

Product Code :
LBNY-0005-12100059

Description :

Electric Vehicle Vacuum Booster Brake System Trainer uses original electric vehicle electric vacuum booster brake system, it can demonstrate the working principle of electric vacuum booster braking system for electric vehicle, to perform training operation for electric vehicle electric vacuum booster brake system adjustment and emptying maintenance.

Structure and composition:

Electric vacuum booster braking system for electric vehicle: brake mechanism, seat, brake booster and other components.

Product Functions:

Brake booster cutaway device, an intuitively understanding of working condition of the brake booster
Dynamically demonstrate the working principle of the electric vehicle vacuum assisted braking system
Achieve electric vehicle vacuum booster brake system adjustment and emptying maintenance and other training operations
Achieve practical operation of assembly and disassembly and components maintenance of electric vehicle vacuum assisted braking system.

Technical Specification :

Power supply: DC 12V
Working temperature: -40 C ~ +50 c
External dimensions: 1.6m x 1m x 1.5m (length x width x height).
