Product Name :
Electric Vehicle Charging Pile Teaching Board

Product Code :
LBNY-0005-12100063

www.laboratoryinstrumentindia.com

Description :

Electric Vehicle Charging Pile Teaching Board is an electric vehicle charging pile teaching board, the teaching board can demonstrate the actual working condition of electric vehicles charging pile through the reasonable combination of IC card reading unit, man-machine interface(MMI), operation / failure / charging indication system, infrared communication unit, light box components.

Functions:

Electric vehicle charging pile has built-in IC card reading unit, MMI and light box assembly, instruction system, infrared communication unit, user can take operation control through the MMI. The electric vehicle charging pile provides credit card area and charging interface. And electric vehicle charging plug is inserted into the charging interface and to be charged by reading IC card through IC card unit.

MMI is a touch screen.

Electric vehicle charging pile external sets an indicator lamp.

Technical Specification :

Training contents:

Electric vehicle failure training

Electric vehicle performance test training

Electric vehicle charging training

Electric vehicle operation training

Electric vehicle disassembly, assembly and commissioning training.
