Product Name :
Automobile Starting System Teaching Board

Product Code :
LBNY-0005-121000116

www.laboratoryinstrumentindia.com

Description :

It can fully display the composition and working process of the car starting system. The teaching board is based on car starting system.

Structure and composition:

Starter, battery, neutral switch, high quality color schematic panel, fault-setting and troubleshooting system, control panel, removable stand, supporting manual and experiment guide book.

Features:

It has the specialized troubleshooting and set areas. Faults can be set and removed manually.
The circuit diagram is printed on the panel which is easy for understanding.
It is based on the real car starting system.
The detection terminal is mounted on the teaching board, signals, such as resistance, voltage, current, frequency, etc can be measured.

Technical Specification :

Production technology:

Power supply: DC12V, battery
With locking casters to mobile devices. it can move freely, and facilitate teaching
Dimensions: about 1260x850x1860mm.
