Product Name :
Integrated Ignition System Teaching Board

Product Code :
LBNY-0005-121000122

Description :

The composition and the working process of various ignition system can be demonstrated. The device is based on the multiple ignition system.

Structure and composition:

The ignition system training device contains total six systems be below:

Platinum contact ignition system,

Magnetic induction ignition system,

Photoelectric induction ignition system

Holzer electronic ignition system,

Independent type ignition system without distributor

Group type ignition system without distributor

And include large capacity battery or 12V switch power, fault settings and troubleshooting system, detection terminal, mobile bench.

Features:

1-6 types ignition system can be demonstrated.

It has the specialized troubleshooting and set areas.

The color circuit diagrams are printed on the panel which is easy for the students to analyses and to understand the ignition system.

Technical Specification :

Production technology:

Power supply: DC12V, battery

Nylon casters with locking casters are assembled under the frame. it can be moved freely, and facilitate the teaching

Dimensions: about 1260x850x1860mm.
