Product Name :
Dem Dissectable Machine

Product Code :
LBNY-0005-121000128

Description :

The DEM is a three-phase asynchronous squirrel-cage motor mock-up that can be assembled and disassembled depending on needs.

This Dem Dissectable Machine is presented in a case containing the following items:

- The motor housing with stator wiring, fitted with a terminal block
- The fan
- The left and right flanges
- The squirrel-cage rotor
- The screws with screwdriver kit.

Technical Specification :

Educational Advantages:

The instructions cover all theoretical research into the operation and technology involved in the three-phase squirrel-cage motor.

Provides a better understanding of three-phase motor technology.

Demonstrates how work three-phase asynchronous squirrel-cage motors.
