Product Name :
Variable Frequency Drive 50/60 HZ

Product Code :
LBNY-0005-121000161

www.laboratoryinstrumentindia.com

Description :

Ideal for machine level speed control, this product provides the application versatility to meet the demand of end-users that require flexibility, space savings and ease of use. The drive automatically provides auto boost and slip compensation. The trainer obtains excellent speed regulation and high levels of torque across the entire speed range of the drive as well as improved speed regulation. Providing users with a powerful motor speed control in a compact, space saving design, the Variable Frequency Drive is the smallest and most cost effective VFD trainer. You Select The Brand And Model Of Drive That You Need The VFD Trainer is Designed To Control The Speed Of Applications Such As Machine Tools, Fans, Pumps And Conveyors And Material Handling Systems. With this kind of drive alternative current squirrel cage motors or synchronous reluctance motors can be varied over a continuous speed range.

Technical Specification :

Educational Advantages:

Easy start up and operation

An integral keypad featuring a 4-digit display plus additional LED indicators, providing an intuitive display of drive status information

Dedicated safety sockets and switches

Relay output

You can select your own drive brand and model

Programmable inputs such as preset speed, jog, etc.

Most common application parameters are contained in a basic program group, making programming fast and easy

Network solutions possibility

Frequency: 50-60 Hz
