Product Name :
Industrial Control Circuits 60HZ

Product Code :
LBNY-0005-121000166

www.laboratoryinstrumentindia.com

Description :

A set of practical experiments (60) is included with all necessary components stored in a steel cabinet, which is hinged and opens out in two sections providing a large convenient working area for the student. The Industrial Control Circuits trainer has been specially designed as an aid to teach the principles of electric motor control circuits and solid-state industrial controls. Interconnections made through piggyback cords. Requires a 120V 60Hz circuit. The components used in the experiments, such as relays, motors, semiconductors, etc., and are interchangeable in the cabinet.

Educational Advantages:

Includes more than sixty experiments
Study of industrial control circuits and solid-states circuits
OEM components mounted.

Technical Specification :

Industrial Control Circuits 60HZ
