Product Name :
Single Phase Wattmeter 60 HZ

Product Code :
LBNY-0005-121000167

www.laboratoryinstrumentindia.com

Description :

Stackable and portable half-size unit. Protected by a diode. Connections can be made through 4-mm color-coded safety terminals using patch cords with banana plugs. Schematic diagrams and specifications are silk-screened onto the back of the front panel of each unit. Interconnections between components and connections are made through standard color coded safety sockets with banana plug jumper leads. The Single Phase Wattmeter 60 HZ trainer consists of one (1) analog wattmeter, 0-750 W, designed to read the active power in single phase circuits. Pre-wired voltage and current inputs.

Educational Advantages:

Pre-wired voltage and current inputs
Consist of one 750W meter that measures real power in single phase systems.

Technical Specification :

Thermal breaker protection
Max. current: 10 A AC/DC
Max. voltage: 150 V AC/DC
Power scale: 0-750 W AC/DC
Power: 120 VAC, 1
Frequency: 60 Hz
Accuracy: 2%.
