Product Name :

AC Magnetic Starter For Three HP 2.2 KW 60 HZ

Product Code :

LBNY-0005-121000168

www.laboratoryinstrumentindia.com

Description :

The starter is equipped with thermal protection facilities, a start-stop push-button station and two pilot lamps indicating respectively the supply and the run state of the motor driven. It is housed in a half-size totally enclosed portable modular unit. The AC Magnetic Starter For 3 HP (2.2 KW) 60 HZ is a three phase magnetic starter for 3hp equipment that is used to teach AC motor control and start motors with higher power and control them at distance. Specifications and/or diagrams are silk-screened on the back of a clear-plastic front panel for ease of identification. The trainer is protected by a either a diode or thermal-magnetic circuit breaker. Connections to the unit are made through 4 mm standard color-coded, five-way binding posts. This permits the utilization of banana-type jumper leads between the power supply and other components in the circuit. Requires a 120/208V 60Hz circuit.

Educational Advantages:

Used in motor control technology teaching when an AC magnetic starter is required
Three phase unit for 3 hp
Indicates respectively the supply and the run state of the motor driven.

Technical Specification :

Reset button on front panel rated at 250 V
Pilot lamps (2): rated 125 V input & output
Rating: 120/208 VAC, 3 hp (2.2 kW)
Number of phase (s): 3
Frequency: 60 Hz.
