Product Name :
Pendulum Impact Tester Electronic Engineering Lab

Product Code :
LBNY-0002-640010

Description :

Pendulum Impact Tester Electronic Engineering Lab

Technical Specification :

Pendulum impact Tester

Impact Testing Machines such as Charpy Pendulum Impact Tester for Charpy and Izod tests of various materials. It works on the principle of the pendulum that is the difference between the height of the top of pendulum before rupture and rises height of its rise after rupture is directly proportional to impact energy absorbed.

Power supply: 230V 1hp,50 Hz 180W

Dimensions: 800 x578x 1400mm

Weight: 450kg

Features:

Safety guard for operator

Compact and sophisticated design

Large dial and digital display

Pendulum Impact Tester Electronic Engineering Lab, Pendulum Impact Tester Electronic Engineering Lab Equipments, Pendulum Impact Tester Electronic Engineering Lab Tools, Pendulum Impact Tester Electronic Engineering Lab Tool Kits, Pendulum Impact Tester Electronic Engineering Lab Manufacturers, Pendulum Impact Tester Electronic Engineering Lab Suppliers from India, China, Kenya
