Product Name :
Centrifugal Contacts

Product Code :
LBNY-0005-121000172

www.laboratoryinstrumentindia.com

Description :

The Centrifugal Contacts are loaded on a spring board installed on the coupling shaft, and is designed to demonstrate the braking of motor. This unit must be included in the mechanical load assembly jointly with the mounting base, the magnetic shoe brake and an inertia wheel. The brake is controlled by a contact that is normally open or closed.

Educational Advantages:

Included in the Mechanical Load Assembly
Designed to demonstrate the braking of motor.

Technical Specification :

Contact arrangement: SPDT (open or closed)
Contact rating: 240 VAC, 30 A or 240 VDC, 1 A
Speed range: 140-750 rpm.
