Product Name :

Variable Three Phase AC Supply 60 HZ

Product Code :

LBNY-0005-121000183

www.laboratoryinstrumentindia.com

Description :

Variable Three Phase Ac Supply unit is also used to teach the principle of variable and fixed autotransformers. The electric connection to the individual power supply is made through an extra softened line cords filled with empty connectors of 4mm diameter. Axial re-entry through a 4mm diameter pin, mounted on color-coded security sockets, can be executed as well. Variable Three Phase Ac Supply 60 HZ unit is useful to power any units requiring variable or fixed AC voltage either for single or three phase network. Requires a 120/208V 60Hz circuit.

Educational Advantages:

Can be used to teach the principle of variable autotransformer and three phase rectifier
Can be used to power various units requiring variable or fixed AC or DC voltages
Compatible with all 3hp units.

Technical Specification :

Thermal protection
Reset button
Fixed AC output: 120/208 VAC, 15 A per phase
Variable AC output: 0-120/208 VAC, 15 A per phase
3 AC input: 120/208 VAC, 15 A
Frequency: 60 Hz.
