Product Name :
Centrifugal Contacts

Product Code :
LBNY-0005-121000189

www.laboratoryinstrumentindia.com

Description :

This unit must be included in the mechanical load assembly jointly with the mounting base, the magnetic shoe brake and an inertia wheel. The Centrifugal Contacts are loaded on a spring board installed on the coupling shaft, and is designed to demonstrate the braking of motor. The brake is controlled by a contact that is normally open or closed.

Educational Advantages:

Included in the Mechanical Load Assembly
Designed to demonstrate the braking of motor.

Technical Specification :

Contact arrangement: SPDT (open or closed)
Contact rating: 240 VAC, 30 A or 240 VDC, 1 A
Speed range: 140-750 rpm.
