**Product Name :**  
Centrifugal Contacts

**Product Code :**  
LBNY-0005-121000189

www.laboratoryinstrumentindia.com

**Description :**

This unit must be included in the mechanical load assembly jointly with the mounting base, the magnetic shoe brake and an inertia wheel. The Centrifugal Contacts are loaded on a spring board installed on the coupling shaft, and is designed to demonstrate the braking of motor. The brake is controlled by a contact that is normally open or closed.

**Educational Advantages:**

Included in the Mechanical Load Assembly  
Designed to demonstrate the braking of motor.

**Technical Specification :**

Contact arrangement: SPDT (open or closed)  
Contact rating: 240 VAC, 30 A or 240 VDC, 1 A  
Speed range: 140-750 rpm.
