Product Name:
Centrifugal Contacts

**Product Code :** LBNY-0005-121000189

## **Description:**

This unit must be included in the mechanical load assembly jointly with the mounting base, the magnetic shoe brake and an inertia wheel. The Centrifugal Contacts are loaded on a spring board installed on the coupling shaft, and is designed to demonstrate the braking of motor. The brake is controlled by a contact that is normally open or closed.

## **Educational Advantages:**

Included in the Mechanical Load Assembly Designed to demonstrate the braking of motor.

## **Technical Specification:**

Contact arrangement: SPDT (open or closed)v Contact rating: 240 VAC, 30 A or 240 VDC, 1 A

Speed range: 140-750 rpm.
