Product Name :
Bus Transit Bus Air Brake Trainer With E Stroke

Product Code :
LBNY-0005-121000205

Description :

The photo above is unique as it incorporates the E-Stroke electronic brake stroke indicator, along with antilock and traction control. All valves and components are new and are fully functional with the exception of the air compressor. The BUS Transit bus displays are unique in design, as most fleets have specific needs and requirements. As a result, we generally build to OEM drawing or prints supplied by the customer. Digital Wheel Speed readouts located at each wheel. Students can observe basic bus brake application operations while viewing wheel speed and pressure readings. Air pressure gauges are strategically positioned throughout the system to show valve operation and air lines are color coded to recommended standards.

Educational Advantages:

- Allows hookup of diagnostic equipment
- Only requires a 120VAC power source and local air supply
- 32 fault switches provide real world fault insertion
- Students can observe bus air brake component operation in a classroom environment
- Also includes fittings and hoses to connect to stand-alone air disc and air drum brakes
- Being smaller than a bus, students can easily perform hands on operations.

Technical Specification :

Bus Transit Bus Air Brake Trainer With E Stroke
