**Product Name :**

New Energy Pure Electric Powertain Disassembly and Assembly Training Platform Electronic Engineering Lab

**Product Code :**

LBNY-0002-660019

**Description :**

New Energy Pure Electric Powertain Disassembly and Assembly Training Platform Electronic Engineering Lab

**Technical Specification :**

New Energy Pure Electric Powertain Disassembly and Assembly Training Platform

The Pure electric vehicle integrated training system didactic equipment automotive Training Kit is based on the modular design of the pure electric vehicle system, including the following six modules:

- Battery management system module,
- Motor drive system module,
- Control system module,
- Air conditioning system module,
- Power steering system module,
- Vehicle electrical system module.

Based on the battery and management system of pure electric vehicle, this platform truly shows the structure, principle and working process of battery and management system of electric vehicle; Equipped with intelligent fault module, it can carry out fault detection and diagnosis, fault simulation and troubleshooting. Connected with motor drive system module and control system module, the structure and working process of battery management system of pure electric vehicle can be demonstrated.

New Energy Pure Electric Powertain Disassembly and Assembly Training Platform Electronic Engineering Lab,  
New Energy Pure Electric Powertain Disassembly and Assembly Training Platform Electronic Engineering Lab  
Equipments, New Energy Pure Electric Powertain Disassembly and Assembly Training Platform Electronic
