Product Name :
Power Seat System Trainer

Product Code :
LBNY-0005-121000249

Description :

Fault insertion included. The trainer requires a 12V power supply to operate. The Power Seat System Trainer allows for the demonstration of a complete power seat system using real-world components. Terminal block receptacles are provided for diagnostic test points.

Educational Advantages:

Four operational faults can be inserted to promote student diagnostic troubleshooting competencies.
Ability to visualize the operation of seat adjustment motors and switches.
Includes wiring schematics.
Ability to test and verify a basic power seat circuit.

Included Components:

Power seat switch
Power seat assembly
Test points for diagnosis
Fault box with 4 faults.

Technical Specification :

Power Seat System Trainer
