Product Name :
Ohms Law And DC Circuits Trainer

Product Code :
LBNY-0005-121000297

Description :

It is designed to help teach Ohms Law basics as well as demonstrating common electrical system components and circuit operation. A student project manual provides circuit construction and learning assignments designed to help students learn. The Ohm's Law And DC Circuits Trainer is a self-contained educational learning system designed to assist instructors in teaching students basic electrical and electronic theory. The case features a carrying handle and has internal storage for jumper test leads and power cord. The Ohm's Law And DC Circuits Trainer is protected with a removable metal cover.

Advantages:

Built in DMM (Digital Multi-Meter) for electrical measurements and diagnosis.
Self-contained package with built-in internally protected power supply.
Can be used to assist the instruction of operational theory of electrical/electronic circuits and components.
Student project manual provides learning assignments for circuit construction and understanding.

Technical Specification :

Ohms Law And DC Circuits Trainer
