Product Name :
Workshop Pug for Bevelling

Product Code :
LBNY-0004-740015

Description :

Workshop Pug for Bevelling

Technical Specification :

Pug for bevelling

Standard for welding

Straight and circle gas cutting of steel plates industries, ship building, PEB Fabrication etc. Can be Swiveled to cut levels up to 45 with Rack and Pinion Durable, efficient and precise horizontal and vertical adjustment of torch Bevel setting with locking facility means bevel accuracy during long cutting Handy light weight and robust machine modeled for long, trouble free application Heat reflector with air gap, which protects the motor and other electrical parts from overheating.

The equipment is light weight, and they have a wrap round handle for easy portability and protection. Single lever ON-OFF mechanism for cutting makes the closing and resuming of cutting very simple and saves gases. Using extendable tracks, this machine can generate straight cuts of any length, square or bevel edge.

With the same precision this machine can cut circles and also shape with gradual curves, when hand guided Travels on standard 1.8 meter extruded aluminum rail.
