Product Name :
Workshop Grinders

Product Code :
LBNY-0004-740017

Description :

Workshop Grinders

Technical Specification :

Grinders

Various sizes 5" and 9" with spare cutting and grinding discs

Ultra-secure Design: The 360° rotational guard redirects the sparks away from the user and eliminates the danger of accidentally touching the wheel with your fingers. The paddle switch ensures emergent shut-off.

With Ergonomic Handle: This grinder tool comes with a slip-resistant handle that can be installed for left or right hand use, and it can offer great stability to avoid bouncing off while doing some tough jobs.

Dust Ejection System: Labyrinth intake vents on unit housing and epoxy coated motor stator and windings stop the dust and debris from entering the power grinder and therefore improves its performance and extends service life.

Easy Installation: Simple design allows our power angle grinders to be quickly installed or disassembled, there will be no extra tools needed. The lock button helps release/lock the cutting wheel with ease.
