Product Name :
Chloride Ion Penetration Meter

Product Code :
LBNY-0005-1220008

Description :

The measurement data can be used to estimate the chloride diffusion coefficient of concrete for the service life prediction and design of concrete structures as well as the durability-based quality control of concrete. Laboratory test device for the measurement of the resistance of the concrete against the penetration of chloride.

Features:

- Flexible logging interval time (1 to 10 min)
- Automatic temperature control system.
- Stand alone operation.
- Easy-to-assemble.
- Accurate (+/- 0.1 mA)
- User-friendly PC software.
- Customizable setup.
- Four measurement channels.
- USB connection to computer.

Technical Specification :

Chloride Ion Penetration Meter

Laboratory Instrument India
