Product Name :
Cor Map For Identifying Areas Of Probable Rebar Corrosion

Product Code :
LBNY-0005-12200014

Description :

A simple method for identifying areas of probable rebar corrosion in concrete structures.

Features and Benefits:

High impedance digital meter is designed for tough field conditions.

Easy to use, supplied complete.

Detachable electrode extension pieces (41 cm long) facilitate measurements in hard to reach locations.

Technical Specification :

Cor Map For Identifying Areas Of Probable Rebar Corrosion
