Product Name :
Compressometer Extensometer

Product Code :
LBNY-0005-12200052

Description :

Compressometer Extensometer consists of a central ring for the diametrical extension measure to be fixed on the compressometer. To measure both axial deformation and diametrical extension of cylinder specimens dia. 150x300mm, 160x320mm, 8x 12 under compression stress, by determining the elastic modulus.

Technical Specification :

Compressometer Extensometer
