Product Name :
Concrete Mixers Pan Type Forced Speed

Product Code :
LBNY-0005-12200054

Description :

The mixers are equipped with a manually controlled discharge opening situated on the bottom part of the pan, for direct unloading of the mixture into a wheelbarrow or suitable container. Used to prepare concrete specimens or mixtures, these pan type mixers ensure a uniform efficient fast mixture action. The pan and the mixing gears have big thickness ratio, the gears are from hardened and rectified steel, and the motor reducer is in oil-bath with Gleason conical coupling. They are of easy and practical utilisation suitable for laboratory and field purposes. The mixing blades and paddle can be adjusted in height; they are manufactured from special quality hardened steel to resist wear.

Technical Specification :

Concrete Mixers Pan Type Forced Speed
