Product Name :
Workshop Grinding and Burning Visors

Product Code :
LBNY-0004-740029

Description :

Workshop Grinding and Burning Visors

Technical Specification :

Grinding and burning visors

Standard for welding

High quality Materials: This welding mask is made of high quality PC material, has a high level of safety protection, impact and crack resistance, and completely protect your face. It has drop resistance, high temperature resistance, good thermal insulation and longer service life

Foldable Design: When you do not use the solder mask for a long time, you can fold it up, which greatly save the time of wearing it again and can effectively improve work lefficiency

Adjustable Knobs and Buckless: The solder mask can be adjusted freely, the larch is comfortable to wear, easy to use, and the tightness is easy to adjust. You can easily adjust the grip by turning the knob to achieve a comfortable effect

Wide field of view: Large screen size for easy observation. Shading level 8. During the welding process, the visibility is high and the welding joints can be clearly observed to ensure the quality of welding

Wide range of Applications: This welding helmet is suitable for various machining environments, fit for electric welding, gas welding, argon welding, cooking, grinding, and anti-impact etc.

Workshop Grinding and Burning Visors, Workshop Grinding and Burning Visors Equipments, Workshop Grinding and Burning Visors Tools, Workshop Grinding and Burning Visors Tool Kits, Workshop Grinding and Burning Visors Manufacturers, Workshop Grinding and Burning Visors Suppliers from India, China, Kenya
