Product Name :
3 Roll Plate Bending Hydro Mechanical Double Pre Pinch

Product Code :
LBNY-0005-12300032

Description :

The PBM DP arrangement 3 Roll Pyramid Type Hydro-Mechanical Plate Bending are planned with twofold side pre-squeezing course of action. The top roller is settled and pre-pinching by both base rolls are through pressure driven barrels. The job is bolstered from one end to complete pre-squeezing and whole shell is moved to wanted curve span. This component makes the machine more gainful and reasonable for taking care of overwhelming employments. Flip side pre-squeezing is done by second base move to finish the shell. The one of a kind outline allows the pre-squeezing of employment by both base rolls; subsequently the occupation is finished in single operation. The complete shell is set up in single operation.

Features:

3 Roll PYRAMID Type outline with twofold pre-squeezing game plan
Twisting rolls are made of combination steel.
Dropper end assurance by pressure driven barrels.
Over-burden prevention
Two base rolls are force driven via planetary apparatus box with electric or water powered engine.
Low part, smooth operation and less power utilization because of water powered framework works at lower weight in littler thickness.
Top roll is repaired and base moves and down.
Base moves up-down through water powered chambers.

Technical Specification :

3 Roll Plate Bending Hydro Mechanical Double Pre Pinch
