Product Name :
Pyramid Type Bending Roller

Product Code :
LBNY-0005-12300034

Description :

Technical Features:

Housing are made from M.S. Plate of suitable strength and mounted on heavy base frame. Rolls are made from forged steel and perfectly machined for accurate result.

For longer life and smooth working of machine, Gun Metal Bushes are provided and given sufficient lubrication system A

Bottom rolls are fixed and driven by Gears and worm Reduction Gear Box. Top Roll rotates in fixed positions and can be adjusted up & down manually by adjustable screws.

Machine Application & Usage:

Cone Making & Other Aluminum & Steel Fabrication, Marine & Ship Building, Pressure Vessels, Wind Mills. Boiler Tank, Air Conditioning Channels, Sheet Metal Cover

Pyramid Type Bending Roller:

Bottom rolls are fixed and driven by Gears and worm Reduction Gear Box. Top Roll rotates in fixed positions and can be adjusted up & down manually by adjustable screws.

Bending Process:

Down the top roll and give pressure on the plate. Then start Main motor in clockwise direction till one end of the plate comes over first bottom roll reverse the motors and get second end on second bottom

Continue above process until you get desired as shown in picture.

Place the Plate between bottom and top rolls by adjusting top roll manually.

Technical Specification :

Pyramid Type Bending Roller
