Product Name :
Semi Hydraulic Hacksaw Machine

Product Code :
LBNY-0005-12300073

Description :

These heavy duty and high precision tools are reasonably priced. Our high speed machines are suitable for fast and bulk cutting. They are built using modern technology to deliver optimum output. Our hydraulic controlled tools are highly dependable, efficient and long lasting. This tool is used for cutting several materials including wood and metal. We supply the finest grade of hacksaw tools that are designed for smooth functioning. They are ruggedly constructed by experts for hustle free operations. We provide various models for this to meet the diverse needs of our customers. They are commonly used in a broad range of industries.

Features:

The hydraulic cutting pressure control system provides different cutting options that make this equipment stay versatile for multiple industries.

It is featured with improved mechanisms to remain supportive for different machining requirements in different industries.

It is one of the best tool room supportive devices.

The vice guide ways have been provided for precisely clamping the work material.

It helps in obtaining parallel cutting operations.

It is incorporated with two speed operating mechanism with which the operator will be able to select the preferable speed for cutting in accordance with the metal compatibility.

We have both semi-hydraulic and mechanical models of hacksaw machines.

Technical Specification :

Capacity Square: 150

No of stroke per min: 65

Cutting Round: 165
Motor (1440 RPM): 1 HP
Blade Size (mm): 350
Approx Weight Kg: 300.
