Product Name :
Auto Feed Radial Drilling Machine

Product Code :
LBNY-0005-12300084

Description :

Auto Feed Radial Drilling Machine is designed to drill complicated shapes of work materials. The drill head motor is very powerful compared the above models and it has the capacity of 105HP for 1440 rotations per minute. The RAM diameter is 78mm and the spindle auto feed ranges between 0.05 and 0.09. The spindle speed is comparatively higher and it is interrelated to the rotations it makes per minute which is 88-2600x8. The closed grain cast iron column, making hole arm, work head and gears are fabricated using imported grinding instruments which make them stay precise for assembling. The maximum making hole radius is 1005mm.

Technical Specification :

Auto Feed Radial Drilling Machine
