Product Name :
Portable PLC Systems Troubleshooting Learning System

Product Code :
LBNY-0005-1240003

Description :

Programming, operating, and troubleshooting skills on modern PLC systems are vital for future professionals. Portable PLC Systems Troubleshooting Learning System provides a highly interactive system that integrates an HMI panel, networking, and a variety of programming commands in order to simulate real-world processes. Portable PLC Systems Troubleshooting Learning System provides a mobile option for teaching both basic and advanced applications as well as sophisticated troubleshooting using the powerful PLC. Combined with thorough curriculum, learners will gain both theoretical and hands-on knowledge that can start them on a path towards a rewarding career. Inside this attractive, durable carrying case, learners will find a world-class learning system with components like the Human Machine Interface (HMI) panel, which allows user input and displays output data.

Features:

PLC Fault Troubleshooting
Mobile training platform that can be used to deliver training at multiple facilities
Student Reference Guide
Rich Applications: Learn both basic and advanced applications using
Modern Multimedia Curriculum with Panel View Plus Terminal and Networking.

Technical Specification :

Portable PLC Systems Troubleshooting Learning System
