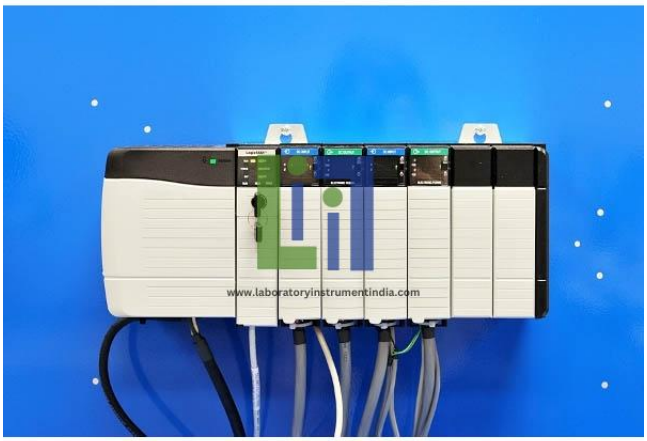
Product Name : PLC Troubleshooting Learning System	**Product Code :** LBNY-0005-1240004



Description :

The PLC Troubleshooting Learning System includes Control Logix processor, I/O rack, (32) 24VDC outputs, (32) 24VDC inputs, power supply, cable set, and integration in the Learning System. The PLC Troubleshooting Learning System Control Logix PLC System adds to the Programmable Controller Learning System to provide model Control Logix PLC application study.

Features:
Provides model Control Logix PLC application study
Strong hands-on skills and curriculum
Adds to the Programmable Controller Learning System
Student Reference Guide
Multimedia Curriculum Available.

Technical Specification :

PLC Troubleshooting Learning System
