**Product Name :**  
Panel View Operator Learning System

**Product Code :**  
LBNY-0005-1240005

#### **Description :**

The Panel View Operator Learning System is designed for higher processors and includes a Panel View 1000 operator terminal, mounting panel, cable set, in-depth curriculum for both theory and lab, and teachers assessment guide.

Panel View Operator Learning System adds to the PLC Troubleshooting Learning System to teach Human-to-Machine Interface (HMI) using Panel View Operator Station and model PLCs. Learners will study industry-relevant skills including how to operate, interface, and program Panel View operator terminals.

HMI operator stations have become commonplace in modern industry because they eliminate wiring, enable operator functions to be modified in software, and provide the ability for the operator to monitor PLC operations data.

#### **Features:**

Designed for higher processors

Reliable, industry standard components and features

Teaches Human-to-Machine Interface (HMI)

Includes a Panel View 1000 operator terminal, mounting panel, and cable set

World-class curriculum that integrates knowledge and skill-building.

#### **Technical Specification :**

Panel View Operator Learning System

**Laboratory Instrument India**
