| Product Name :
Panel view Plus Learning System | Product Code :
LBNY-0005-1240006 |

Description :

Panel view Plus Learning System will be used to cover major topic areas like application editing, tags and communications, input and output objects, local messages, and alarms, diagnostics, and information messages. The Panel view Plus Learning System adds to the Programmable Controller Troubleshooting Learning System and covers how to program and operate a Panel View Plus 6 1000 HMI operator interface terminal. In addition to this system requires a Control Logix PLC System, PLC Ethernet Learning System Panel view Plus Learning System and Factory Talk View ME Programming Software. The Panel view Plus Learning System includes Panel View Plus 6 1000 with touch screen, Ethernet cable, and mounting console. Human-Machine Interface (HMI) operator stations have become commonplace in modern industry because they eliminate wiring, enable operator functions to be modified in software, and provide the ability for the operator to monitor PLC operations data. This learning system combines industry-standard components for real-world learning and durability and combines it with in-depth curriculum so that learners can practice hands-on skills while gaining the knowledge necessary to understand the reasons behind the skills that they're practicing.

Features:
Panel View Plus 1000 touch screen
Student Reference Guide
ME Studio software
Optional Online eBooks.

Technical Specification :

Panel view Plus Learning System

Laboratory Instrument India
