Product Name :
PLC Control Net Learning System

Product Code :
LBNY-0005-1240007

Description :

The PLC Control Net Learning System includes: two Control Net modules, two Control Net taps, Control Net cable, Software, supplemental disk, mounting hardware, student curriculum for both theory and lab, and a teacher's assessment guide. Students will learn how to install, configure and troubleshoot Control Net networks. The PLC Control Net Learning System adds PLC Troubleshooting Learning Systems to teach the fundamentals and troubleshooting of industrial communications networks using Control Net, a popular Control Logix control network. Technicians must be able to understand, install and troubleshoot these networks. Control Net is a high-speed deterministic network for transferring both scheduled and unscheduled messages on the same cable. The rapid exchange of data between departments within a manufacturing facility has become an integral part of the production process.

Features:

Industrial Components

Hands-on Skills

Optional Online eBooks

Student Reference Guide

Teaches the fundamentals and troubleshooting of industrial communications networks using Control Net, a popular Control Logix control network.

Technical Specification :

PLC Control Net Learning System
