Product Name :
Portable PLC Programming Operation

Product Code :
LBNY-0005-1240011

Description :

The Portable PLC Programming Operation uses unique electronic fault insertion, to teach PLC troubleshooting skills, such as PLC input and output testing, software testing, and application troubleshooting. The Portable PLC Programming Operation PLC Troubleshooting Learning System provides comprehensive curriculum and a cutting-edge workstation to teach PLC (Programmable Logic Controller) programming, operation, and applications used in industry. The Portable PLC Programming Operation comes with a mobile carrying case, workstation mounting panel, master control relay circuit, software, a Panel View Plus terminal, an Ethernet Switch, I/O Simulator, five application circuits, student curriculum, instructor's assessment guide, and installation guide. Learners will study the industry-relevant application and PLC system troubleshooting skills that are so needed in today's workplace. Learners study both basic and advanced applications using Plus, and networking throughout the curriculum.

Features:

Mobile training platform that can be used to deliver training at multiple facilities or for convenient storage
Teaches PLC (Programmable Logic Controller) programming, operation, and applications used in industry
Uses unique electronic fault insertion, to teach PLC troubleshooting skills.

Technical Specification :

Portable PLC Programming Operation
