Product Name :
Portable PLC Learning System

Product Code :
LBNY-0005-12400012

Description :

The system's highly-interactive multimedia curriculum takes the learner through 14 modules covering 89 skills that provides an unmatched breadth and depth of knowledge and skill building only can provide this level of training using a compact, portable workstation. Learners use the powerful plus terminal, and networks throughout the curriculum to build basic skills, such as program editing, to more advanced skills, such as analog output scaling. Portable PLC Learning System is a portable solution for when there is a need to teach PLCs where there is limited space such as in a conference room, lab area, or even a shop floor desk. Its compact size and durable case also provide for safe storage when your limited space must be used for teaching other subjects or when the system must be transported to a different location in the facility for use.

Features:

Highly-interactive multimedia curriculum takes the learner through 14 modules covering 89 skills that provides an unmatched breadth and depth of knowledge and skill building.

A portable solution for when there is a need to teach PLCs where there is limited space such as in a conference room, lab area, or even a shop floor desk.

Enhances learning through a wide array of real world applications that allows learners to actually see their programs control real systems.

Technical Specification :

Portable PLC Learning System
