**Product Name :**  
PLC Technician Troubleshooting Learning System

**Product Code :**  
LBNY-0005-12400015

#### **Description :**

The PLC Technician Troubleshooting Learning System module easily mounts to the workstation and includes cables to ensure full compatibility. The fault kit includes I/O cables for connection of the PLC to the I/O on the Learning System. The PLC Technician Troubleshooting Learning System PLC includes all the hardware components needed to support the PLC Technician Troubleshooting Learning System student learning materials. Factory installed integration package creates faults specific to the PLC. This fault package is fully compatible with the computer-based fault insertion system supplied with the Learning System. The PLC Technician Troubleshooting Learning System includes: PLC, communications cable, I/O connector kit, fault insertion engineering and connector kit, supplemental CD, student curriculum for both theory and lab, and teacherassessment guide.

#### **Features:**

- Student Reference Guide
- Adds to the PLC Workstation
- Hands-on Skills
- Optional Online eBooks
- Teaches troubleshooting, programming and applications of the Siemens PLC.

#### **Technical Specification :**

PLC Technician Troubleshooting Learning System
