Product Name :
Laser Therapy

Product Code :
LBNY-0005-12400021

Description :

This radiation does not produce heat, it does not alter the tissues and it is not felt by the patient that is under therapy. It performs an anti-inflammatory and revitalizing action. I.R. (Infrared Radiation) is a beam of non visible, unidirectional and monochromatic light (since it is emitted in the infrared band) that transfers remarkable amounts of energy represented by photons

Theoretical topics:

Features of the Laser
Introduction to the Laser
Semiconductor Laser
CO2 Laser

Circuit blocks of Laser Therapy
Typical circuit of an IR Laser
Main applications of the Laser Therapy.

Technical Specification :

Laser Therapy

Laboratory Instrument India
