Product Name :
Magnetotherapy

Product Code :
LBNY-0005-12400022

Description :

Consequently, they cause a fast regeneration of the bony and cutaneous tissues and considerably increase the immune defenses of the body. Low frequency and low intensity magnetic fields and high frequency electromagnetic fields, act on the whole body through an effect of substitution or activation of the missing electrical currents, where the magnetic component is almost equal to the electrical component.

Circuit blocks:

Typical circuit of a Magnetotherapy
Main functions of the Magnetotherapy.

Theoretical topics:

The Magnetotherapy
Equipment for Magnetotherapy
Outline of electromagnetism
The electromagnetism in the medical practice.

Technical Specification :

Magnetotherapy

Laboratory Instrument India
